

## 1 ORIENTATION WEEK

Orientation week, where you become acquainted with your studies at the Faculty of Industrial Engineering Novo mesto.

## 2

## LENGTH

Each class lasts a few weeks (depending on the number of credits) and are held consecutively (i.e., lectures, exercises, final exam, and then a new class).

## 3

## SCOPE

- With part-time studies, the amount of direct contact ranges up to thirty percent of allocated hours for full-time studies.
- The difference is compensated with guided work online, continuous assessment, seminar and project tasks, research projects, problem-based learning, preparation for exams, or other forms of assessment, and/or preparing and defending project tasks.

## 4

## CLASSES

- Classes are held in [Novo mesto, Slovenia](#) at the Faculty of Industrial Engineering Novo mesto.
- Participation and collaboration is expected during class.
- Classes that also have laboratory exercises will be held on school premises or in high-technological companies.
- You will complete continuous assessment tasks, participate in discussions, and at the end you will be evaluated based on the quality of your work.

## 5

## TEACHERS

- You are guided throughout the process by qualified higher education teachers.
- Higher education teachers are recognized professionals from the field as well as reputable higher education teachers and researchers.

## 6

## EXAMS

- When all requirements are completed for the class, you can register for the final exam.
- Part of the final exam could be a project based seminar task and/or continuous assessment. Depending on individual classes, the final exam may be oral and/or written (depending on the approved syllabus).

# CONGRATULATIONS

you completed your exam! It's time to take the next class.
